

BZH-120 Automatic Filling Boxes Machine

BZH-120 Automatic Filling Boxes machine. It is a multi-functional product, which adjusts the specification of bottles (modulating some parts of the machine to fill various bottles) at the same time. Introduction of different styles can be enveloped 1-4 times (as requested by customers) and put into the medicine boxes. Production Number can be printed in the same step. The machine adopts the operation system which can show the production speed and amount. It is equipped with an automatic detection device which can automatically cull boxes (without introduction); stop work and show in the operation screen in case of none bottle or failing to opening medicine boxes and then begins to work after recovering.

Specifications and Parameters

Max production capacity(Bottle/min): 40-60

Specification(mm): $(65-85) \times (40-70) \times (12-50)$

Introduction specification(mm): $(90-200) \times (130-160)$

Voltage/Frequency(V/Hz): 220/50

Power(Kw): 1.1

Pressed air(mpa): 0.6

Air consumption(L/min): 30-90

All Measurement(mm): $(1175+1040) \times (1030+120) \times 1550$

Weight(kg): 900
