

BZX-120 Semi-automatic Carton Packer

BZX-120 Semi-automatic Carton Packer has wide range of use and covers small floor space. It can be used alone and also can be used with our company front-end RSS300 Thermal Shrinkage Packer...etc. to implement the packing production-line. This machine is a carton packer adaptable to manifold packing specifications. If only operators push open inner chambers of corrugated cartons manually as per different specifications and according to product packing requirements on quantities, telescope them into the machine's adjustable discharge hole, seal covers of carton bottom with joint sealing sheets and start manually (or "Auto" gear) , this machine will automatically superpose different kinds of cuboid products such as boxes or packs,...etc. & flat throw them into cartons. Then cartons filled up with products are automatically reversed onto the conveyance roller and can be directly sealed & packed.

BZX-120 Semiautomatic Carton Packer is compact in structure, convenient to adjust & use, safe & reliable in operation. It can validly guarantee the quality of products, promote production efficiency and relieve labor intensity.

Basic Technical Parameters

Production capacity: MAX: 120 Carton(s)/hour
Packing scope:
Scope of packed things:
Minimum size: 50 (L) X 50 (W) X 15 (H) mm
Maximum size: 115 (L) X 550 (W) X 100 (H) mm
Carton size : (Inner chamber)
Minimum size: 430 (L) X 280 (W) X 200 (H) mm
Maximum size: 550 (L) X 420 (W) X 310 (H) mm
Packaging material: Corrugated carton
Working air pressure : 0.6MPa
Work noise: <75Db
Supply voltage : 3-phase 380V 50HZ Ground connection
External Measurement: 2050(L) X 1800(W) X 1750(H) mm
Total weight: 480KG
